-----------------	---

DESLORATADINE

Products Affected

- Desloratadine

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to levocetirizine.
-----------------	---

EPLERENONE

Products Affected

- Eplerenone

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to spironolactone or spironolactone-hydrochlorothiazide.
-----------------	---

ESOMEPRAZOLE

Products Affected

- Esomeprazole Magnesium
- Esomeprazole Magnesium Dr

Details

Criteria	Claims history in last 365 days or documentation of failure of or intolerance to two of the following: omeprazole, pantoprazole, lansoprazole or rabeprazole
-----------------	--

IV ESOMEPRAZOLE

Products Affected

- Esomeprazole Sodium

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to IV pantoprazole.
-----------------	--

MYRBETRIQ

Products Affected

- Myrbetriq

Details

Criteria	Claims history in last 365 days or documentation of failure of or intolerance to two of the following: oxybutynin, tolterodine or trospium.
-----------------	---

OLMESARTAN

Products Affected

- Olmesartan Medoxomil TABS
- Olmesartan Medoxomil/hydrochlorothiazide

Details

Criteria	Claims history in last 365 days or documentation of failure of two different types of angiotensin receptor blockers: 1) losartan or losartan-hctz, 2) irbesartan or irbesartan-hctz, 3) valsartan, or valsartan-hctz, 4) candesartan or candesartan-hctz 5) eprosartan, 6) telmisartan, telmisartan-amlodipine, or telmisartan-hctz.
-----------------	--

PHOSPHATE BINDERS

Products Affected

- Fosrenol PACK
- Lanthanum Carbonate
- Renagel TABS 800MG
- Sevelamer Carbonate

Details

Criteria	The following criteria is not required for members who are stable on medication: prescription claim in the past 365 days or medical record documentation of failure of, intolerance to or contraindication to calcium acetate.
-----------------	--

QUETIAPINE ER

Products Affected

- Quetiapine Fumarate Er

Details

Criteria	The following criteria applies to members who newly start on the drug: Prescription claim or medical record documentation of failure of or intolerance to aripiprazole.
-----------------	--

RASAGILINE

Products Affected

- Rasagiline Mesylate TABS

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to oral selegiline.
-----------------	--

RISEDRONATE

Products Affected

- Risedronate Sodium

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to alendronate and ibandronate.
-----------------	--

ROZEREM

Products Affected

- Rozerem

Details

Criteria	Step therapy required for members age 64 and younger. Claims history in the past 365 days or documentation of failure of or intolerance to zolpidem and zaleplon.
-----------------	---

SAPHRIS

Products Affected

- Saphris

Details

Criteria	The following criteria applies to members who newly start on the drug: Prescription claim or medical record documentation of failure of or intolerance to two of the following: risperidone ODT, olanzapine ODT, aripiprazole ODT.
-----------------	--

SHORT-ACTING BETA AGONIST INHALERS

Products Affected

- Levalbuterol Tartrate Hfa
- Proventil Hfa
- Ventolin Hfa

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to ProAir HFA.
-----------------	---

SILENOR

Products Affected

- Silenor

Details

Criteria	Step therapy required for members age 64 and younger. Claims history in the past 365 days or documentation of failure of or intolerance to zolpidem and zaleplon.
-----------------	---

TINIDAZOLE

Products Affected

- Tinidazole TABS

Details

Criteria	Criteria does not apply to giardiasis. Prescription claim in the past 30 days or medical record documentation of failure of or intolerance to oral metronidazole.
-----------------	---

TOLCAPONE

Products Affected

- Tolcapone

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to entacapone.
-----------------	---

TOLTERODINE ER

Products Affected

- Tolterodine Tartrate Er

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of, intolerance to or contraindication to immediate release tolterodine.
-----------------	---

TRAVATAN Z

Products Affected

- Travatan Z

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to latanoprost.
-----------------	--

TRELEGY ELLIPTA

Products Affected

- Trelegy Ellipta

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of or intolerance to 1) a inhaled corticosteroid/long-acting beta agonist combination such as fluticasone-salmeterol, Breo or Dulera or 2) an inhaled corticosteroid such as Qvar or Flovent combined with a long-acting beta agonist such as Serevent or Brovana or a combination product such as Stiolto or Anoro Ellipta.
-----------------	---

TROSPIUM ER

Products Affected

- Trospium Chloride Er

Details

Criteria	Prescription claim in the past 365 days or medical record documentation of failure of, intolerance to or contraindication to immediate release trospium.
-----------------	--

ULORIC

Products Affected

- Uloric

Details

Criteria	Claims history in the past 365 days or documentation of failure of or intolerance to allopurinol.
-----------------	---

ZOLMITRIPTAN

Products Affected

- Zolmitriptan TABS
- Zolmitriptan Odt

Details

Criteria	Claims history in last 365 days or documentation of failure of or intolerance to 1) sumatriptan and 2) naratriptan or rizatriptan.
-----------------	--
